

## OBA Courses

In 2014, AHPRA together with the NMBA undergone an extensive research to a permanent and consistent approach in the process of nursing registration. The Outcome Based Assessment is implemented in the beginning of the year to facilitate quality and safety in the care of the Australian consumers and clientele. The Outcome Based Assessment is divided into two parts – NCLEX and OSCE.

NETA provides high quality and standard preparation class for both parts of the exam to facilitate success in the registration process. In addition, our educators are trained to coach in both NCLEX and OSCE and have acquired professional and post graduate studies to guide you throughout the journey. There are a number of reasons why international nurses need to attend an Outcome Based Assessment Training and Education:

1. The OBA is required by AHPRA through a referral letter
2. AHPRA has advised the candidate to undertake OBA after the self check.

Why take the OBA preparation class ?

As much as you want to succeed, we would like to see you succeed and join the nursing workforce. NETA takes pride in producing high quality international nurses prepared to take the OBA for Australia. NETA does not only have more than 5,000 banked questions but also provides coaching and support through live online classes from our NCLEX and OSCE educators. We also extend our support through face to face intensive coaching. Our NCLEX and OSCE materials are of high quality that reflects the Australian Standards of Practice for nursing. We know that your intention is to practice in the Australian Health Care System. Our educators who are registered nurses in Australia and have gained more than 10 years of experience in Australia will coach you on strategies, tools and pathways to select the right answers during your exam.
